

Make music any way you can move.

An accessible browser-based music and visual instrument for cause-and-effect play, music-making, and sensory-friendly creative activities. Plays by touch, mouse, switch, head movement, eye movement, or any visible motion.

PRIVACY AT A GLANCE

- No accounts, no sign-in, no rosters
- No personal data collected from anyone, students included
- No ads, analytics, trackers, chat, or user content
- Camera and mic: optional, processed on the device, never recorded or uploaded

STUDENT DATA, COPPA, FERPA

- No education records or student personal information are created, received, or stored
- Nothing collected means nothing to consent to, disclose, or delete
- We will complete your district privacy questionnaire on request

FOR IT

- One domain to allow: lightsoundcolors.com
- No third-party requests during play
- No install, extension, or admin rights
- After loading, play runs locally on the device

ACCESSIBILITY

- Accessible Play mode: no flashing, large pads, switch scanning, 3 skill levels
- Hands-free head and eye pointer with adjustable dwell (0.5 to 1.5 s), blink to pause
- Respects system reduce-motion; Calm mode in the full Studio
- Helper guide for staff at lightsoundcolors.com/guide

DEVICES AND BROWSERS

- Chromebooks, iPads, Android tablets, Windows, Mac
- Current Chrome, Edge, Firefox, or Safari
- Camera needed only for motion and eye play; touch play works without it

PURCHASING

- Free version is free for classroom, therapy-practice, recreation, and nonprofit use (in the terms, not a promotion)
- Optional Pro unlock: \$12 one time, verifies on up to 5 devices
- Invoice, purchase order, or W-9: email us

Pilot programs: we are recruiting a small number of pilot classrooms, therapy practices, and after-school programs. Direct developer support, honest feedback wanted. Email with "Pilot" in the subject.

Statements above describe how the shipped product works and can be verified against the product and its privacy policy; they are factual descriptions, not third-party certifications. A formal VPAT has not been produced yet; email us if your procurement requires one. The full Creative Studio contains flashing visuals and shows a seizure notice; Accessible Play is the no-flash option. Not a medical device.
